

This **Rainmeter Suite** includes **4 Christmas skins**:

- **Date and Time** skin
- **Weather** skin*
- **Music Player-Info** skin*
- **Photo-Show** skin*
- and the **Wallpaper**.

-The **Weather** needs configuration for your home town, click on the **weather icon** and the settings window will appear, there you can personalize the weather for your town, it is easy, there are detailed instructions. To see the changes please **hit enter** close the settings window and **refresh the skin**, by **right** clicking on the **skin**, a popup menu will appear with the command "**Refresh skin**".

- **Music Info/Player** supported players:

- **AIMP**: Fully supported.

- **foobar2000**: Fully supported. The **foo cad plugin** needs to be installed. Download from this address:
(<https://github.com/RangerCD/foo-cad-plus/releases/>)
- **iTunes**: Fully supported.
- **J. River Media**:
Fully supported through the CAD interface, more information <https://yabb.jriver.com/interact/index.php?topic=84508.0>
- **MediaMonkey**: Fully supported.
- **MusicBee**: Fully supported.
- **Winamp**: Fully supported.
- **Windows Media Player**: Fully supported.
- **Spotify**: Partially supported. Artist, Track and Play/Pause, Stop, Next, and Previous are available.

- The **Photo-Show** skin can use any folder of your PC if you edit the skin and change the path to point to your preferred folder.

- The **Time-Date** skin don't need any instructions.

- * You can **change the size** of these skins, (except the Time-Date and the Photo-Show skins), by pointing the cursor on any part of them and scroll the mouse wheel forward or backward. Don't do it fast, it may crash the Rainmeter, in this case, just run again the Rainmeter and everything will be OK.

- You can always **rearrange** the place of a skin on your desktop, **enable** or **disable** any of them or use a different wallpaper, according to your personal taste and needs.

Happy Holidays!
